## MLLE. PAVLOVA DESCRIBES NEWEST SOCIETY DANCE

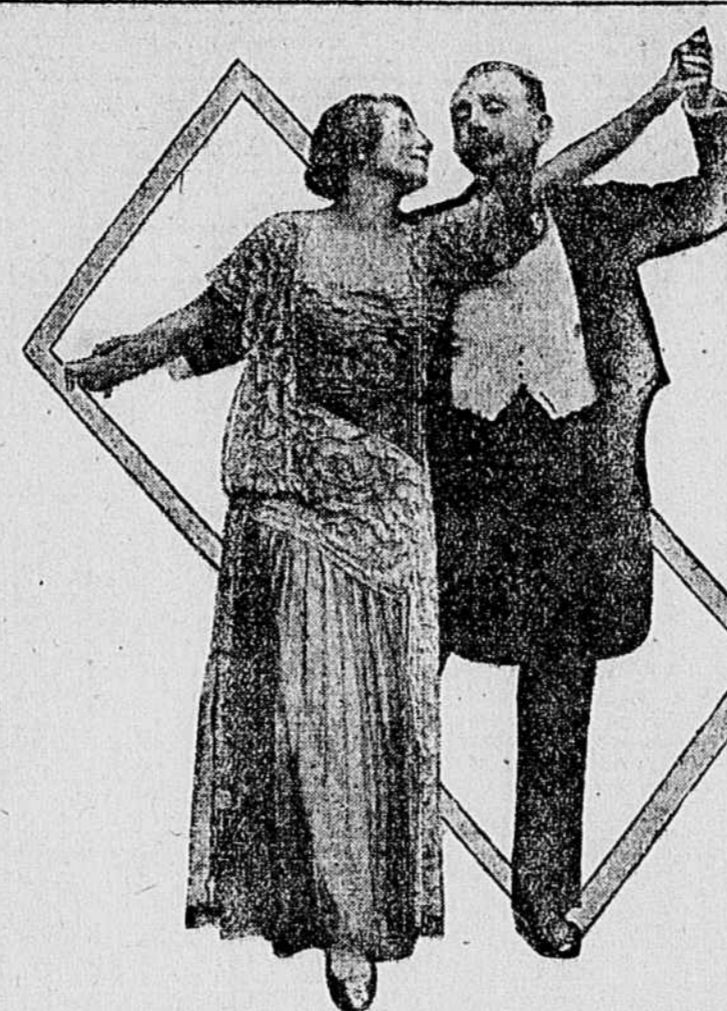

The Promenade, a Russian Variation in the One-Step, is Demonstrated by Premiere Danseuse.

The sixth figure in my standardized One-Step, which I term the promenade, is typically Russian. It has gratifying features that fit perfectly into the rhythm of the music, and makes an excellent concluding division to the dance. When the dancers finish the fifth figure in my version of the One-Step, they have moved in a direction exactly opposite to that they originally took. The lady finishes this fifth figure, called the forward-gliss, she is sustaining the weight of her body on her left foot, which is in advance of her right. Her partner, who is on his lady's right, supports himself on his right foot, which is in advance of his left, and

holds, with his left hand, the right hand of his lady.

Beginning the promenade, the lady, on the count of "one," turns to her right on the ball of her left foot and takes the shortest possible step with the right foot. As she starts this evolution she withdraws her right hand from the left of her partner, whose part in the promenade is to pass beyond his lady and facing about to take up a position such as is depicted in the accompanying photograph for which I and M. Clustine posed. On count "two" of the music, the lady points the toe of her right slipper and extends both left and right arms as I have illustrated in my pose, the left being up, and to the left at full length so that the tips of the fingers are on a line with the top of the head. The right arm being turned back and downward to a point about level with the waist. Meanwhile, the cavalier steps forward on the count of "one" with a fairly long step, dropping his lady's right hand with his left and gauging his step so that it carried him to his left and finishes with a quarter-whirl on the ball of the foot that enables the next step, which is quite short, taken on count "two," to bring the cavalier in a position in which he faces a direction opposite to that at the close of the previous figure. With the count of "three," which is quite short, the extended hands of his lady, who is directly in front of him and as much as possible to his right. Close together, now, the promenade begins on count "three," which is taken by each dancer on the left foot lifting foot and striding about five inches, and to the left. The next step, taken by each dancer with the right foot, comes on count "four," and completes that rhythmic unit. With the start of count "five" the dancers, assuming the same attitudes, continue their forward promenade, but change the direction to the right for four full counts.
